Kalories application

Overview

The application have two sections :
- Personal section (Where a user can see, add, modify delete their meals and calories)
- Administration section (Where Admin user can modify the number of calories per day)

The application have two roles :
- Admin
- User

User login cannot access admin area . (403 error)
Admin user can only access admin area. (403 error)

User use case

- After login (if authorized) users are redirect to their calories per day page.
- They can search for a time period.
- They visualize days (green if the total calories per day is below threshold , red if hover) .
- Clicking on a day show all the meals for that day and they can edit the single meal.
- They can add a meal (day, time a description and number of calories)

Admin use case

Admin user can change calories threshold
- After login (if authorized) admin is redirect to settings page.
- They can change calories theshould
